

The Institutional Repositories Hosting Service (SARI) is intended to be used by any of the scientific institutions and higher education for hosting your repository with individualization of their identity. In addition to customizing the image repository, each institution can also define and implement the settings and parameters as it deems appropriate to its organizational structure and its policies of self-archiving of publications and management of the repository.

The SARI is provided under SaaS (Software as a Service), ie, based on their own infrastructure of the project (hardware, hosting, connectivity, foundation systems, applications, perimeter security, backup service, monitoring and alarmist) whose management and operation is done by the project team. Additionally, the SARI provides backup of the contents deposited in repositories and a support service (helpdesk).

The operation and management of each repository is the responsibility of the institution to which it is associated. Accordingly, in the process of joining the service SARI beyond support for initial setup, the institutions also receive basic training targeted to managers and repository administrators.

The platform supports the SARI is [DSpace](#) (developed by [MIT](#) and [HP](#) , and software available as open source under a BSD license), version 1.6.2.

Are currently housed in the SARI the following repositories:

- [Repositório Aberto](#) – Universidade Aberta
- [Repositório da Universidade dos Açores](#) - Universidade dos Açores
- [Repositório dos Hospitais da Universidade de Coimbra](#)
- [Sapientia](#) - Repositório Institucional Universidade do Algarve
- [UTL Repository](#) – Universidade Técnica de Lisboa
- [ARCA](#) - Instituto Gulbenkian de Ciência
- [Biblioteca Digital](#) - Instituto Politécnico de Bragança
- [IC-online](#) - Instituto Politécnico de Leiria
- [UBIthesis](#) - Universidade da Beira Interior
- [Repositório Comum](#)
- [Repositório Científico do IPCB](#) - Instituto Politécnico de Castelo Branco
- [Repositório do LNEG](#) - Laboratório Nacional de Energia e Geologia
- [Repositório do ISPA](#) - Instituto Superior de Psicologia Aplicada
- [Repositório do HFF](#) - Hospital Prof. Doutor Fernando Fonseca
- [Repositório do Instituto Politécnico de Santarém](#) - Instituto Politécnico de Santarém
- [Repositório CHP](#) - Centro Hospitalar do Porto
- [Digituma](#) - Universidade da Madeira
- [Veritati](#) - Universidade Católica
- [Repositório UL](#) - Universidade de Lisboa
- [Repositório Científico](#) do Instituto Politécnico de Viseu

- [Repositório](#) do Centro Hospitalar de Lisboa
- [Repositório Científico](#) do Instituto Nacional de Saúde

It is expected that the service SARI will be available to a wider and diverse range of national institutions (other universities, polytechnics, state laboratories, associated laboratories, etc.).

You can find [here](#) the service conditions of the Hosting Service.
